

Sample Trust Center Export

KoraPay Cloud Services - Demo Trust Center

PUBLIC

v2026.05

May 2026

Audience

Enterprise buyers, procurement teams, customer success teams, and founder-led sales teams.

Scope and disclaimer

Demo Trust Center export generated from sample data for a fictional company. Readiness states are examples and do not imply certification.

Public posture summary

KoraPay Cloud Services is a fictional demo company used to show how ASIRI can package security, privacy, and procurement evidence into a buyer-facing Trust Center export.

Trust Center status	Demo public profile.
Primary audience	Enterprise buyers and security reviewers.
Disclosure model	Public summaries with gated documents for qualified reviewers.

Framework readiness indicators

NDPA operations	In progress - DPO assigned, ROPA maintained, DPIA workflow active.
Security questionnaire	Ready for buyer review - standard answers maintained.
Vendor management	In progress - sub-processor list and review cadence maintained.
Assurance reports	Not represented in this sample export.

Security controls summary

- Role-based access for production and support workflows.
- Encryption expected for data in transit and managed storage.
- Incident response owner assigned with customer notification workflow.
- Access review and evidence freshness reminders tracked in ASIRI.

Privacy controls summary

- DPO ownership and business-system inventory maintained.
- DPIA workflow used for high-risk changes.
- DSR intake, assignment, response, and closure status tracked.
- Retention and deletion responsibilities documented by system owner.

Sub-processors

Cloud infrastructure	Regional cloud hosting provider - sample category.
Email delivery	Transactional email provider - sample category.
Support tooling	Ticketing and customer support provider - sample category.
Analytics	Product analytics provider with minimized event data - sample category.

Document access model

Public	Security overview, privacy overview, sub-processor categories, and contact route.
Gated	Security questionnaire, DPA, detailed sub-processor list, and policy extracts.
NDA-required	Architecture review, detailed incident records, and customer-specific evidence.

Freshness signals

- Trust Center owner reviewed public posture in May 2026.

- Sub-processor categories reviewed this quarter in the sample record.
- DPIA workflow and DSR workflow show current owner assignments.
- Expired evidence would be flagged for customer review before sharing.

Subscriber workflow

Qualified buyers can request access to gated documents and subscribe for material Trust Center updates. Subscribers receive change notices when the Trust Center owner publishes relevant posture or document updates.

Contact

For the demo Trust Center, buyers would use the request-access workflow to ask for gated documents. For ASIRI product questions, route inquiries through asiri.ng/company/contact-sales.
